Training & Consulting: Fellowship

The Fellowship for Gynecologists offers a **customized training** program spanning one to two years, specifically designed for doctors specializing in Obstetrics and Gynecology, Reproductive Endocrinology, or related fields. It caters to those seeking additional training and experience in assisted reproduction and reproductive health.

The Fellowship program includes:

Medical office activity

- > First visit and anamnesis
- > Infertility research
- > Delivery of information to patients; communication of results
- > Decision-making process
- > Management of controlled ovarian stimulation procedures and follow-up
- > Ultrasound for investigation and diagnosis of infertility
- > Ultrasound for monitoring the follicle and preparation of the endometrium
- > 3D ultrasound to evaluate the uterine cavity
- > Appointment after a negative pregnancy test
- > Exchange of information with a multidisciplinary team (Immunology, Endocrinology, Obstetrics, minimally invasive surgery, etc.)
- > Artificial insemination (Training to perform the technique. You could perform this procedure on selected patients with whom you have established a doctor-patient bond, and the patient accepts it.)
- > Ovarian rejuvenation

Oocyte pick-up

- > Clinical practical training in follicular puncture

Embryo transfer

- > Visit of the embryo transfer rooms
- > Providing information to patients about embryology and transfer
- > Embryo transfer process (Training to perform the technique: mock transfer. You could perform this procedure on selected patients with whom you have established a doctor-patient bond, and the patient accepts it.)
- > Ultrasound to guide embryo transfer

Surgical activities

- > Hysteroscopy related to infertility: diagnostic hysteroscopy procedure (Based on the development of the fellow and his commitment to the surgical team, the technique could be performed)
- > Summary and discussion of the results
- > Myomectomy (You would not perform the technique, but you could be an assistant as a second surgeon)
- > Laparoscopy (You would not perform

The IVIRMA Fellowship offers a comprehensive clinical experience in diagnosing and treating fertility problems, enabling participants to become experts in the field. Our state-of-the-art IVI clinics boast cutting-edge technology, providing participants exposure to the latest techniques and advancements. This program affords the opportunity to closely collaborate with esteemed experts in Reproductive Medicine, benefiting from valuable mentorship and engaging in collaborative research and clinical projects.

Additionally, the program includes training in advanced surgical procedures related to reproductive health.
